PROFESSIONAL SUMMARY

Backend Developer with 2+ years of experience across full-time and internship roles, building REST APIs and microservices with PHP (Laravel, Lumen) and MySQL in the banking sector. Hands-on with Docker, Kubernetes, CI/CD, and Application Performance Monitoring (Datadog, New Relic). Computer Science graduate (GPA 3.92/4.00, Summa Cum Laude) whose thesis focused on Kubernetes autoscaling for API-based applications. Experienced in mentoring developers and working with cross-functional teams to deliver reliable software.

TECHNICAL SKILLS

Programming Languages: PHP, Go (Golang), Python, JavaScript, TypeScript, Java, C++, C#, C, R, HTML, CSS
Frameworks & Libraries: Laravel, Lumen, Spring Boot, Gin, Go Fiber, .NET, React, Bootstrap, Tailwind CSS
Databases & Messaging: MySQL, PostgreSQL, SQL Server, MongoDB, Redis, Apache Kafka
DevOps & Cloud: Docker, Kubernetes, Rancher, Portainer, Harbor, Bamboo, CI/CD
Monitoring & Observability: Grafana, Prometheus, Loki, Datadog, New Relic
Tools: Git, GitHub, Bitbucket, Jira, Confluence, SonarQube, Figma
Concepts: REST API, Microservices, System Design, Backend Development, Frontend Development, Full Stack Development, Agile
Soft Skills: Leadership, Teamwork, Teaching, Collaboration
Languages: Indonesian (Native), English

WORK EXPERIENCE

Backend Developer | **PT Bank Rakyat Indonesia (BRI)** Jul 2026 – Present
Full-time, IT Application Development Indonesia

- Designed, built, and maintained 8+ REST API endpoints using PHP and Laravel Lumen to support complex business workflows, including data validation, inquiry management, approval processes, and inter-service communication.
- Managed 8+ MySQL database tables, handling schema changes, migrations, relationships, and indexing.
- Worked closely with 10+ cross-functional team members, including system analysts and designers, frontend developers, QA testers, principals, and adjacent teams, to deliver application features.
- Implemented and supported features across 2+ microservices that power core business processes.

Backend Developer Intern | **Time International** Feb 2025 – Jan 2026
Internship, Information Technology and Digital Indonesia

- Delivered 5+ software projects end to end, from planning to deployment.
- Built 40+ RESTful APIs using Laravel to support backend functionality.
- Shared insights in 2+ knowledge-sharing sessions to strengthen team collaboration.
- Partnered with 8+ Information Technology and Digital team members to deliver impactful solutions.
- Contributed to 5+ mailing modules, including email automation and template management.

Software Engineer Intern | **Bina Nusantara IT Division** Mar 2024 – Jan 2025
Internship, IT Architect Indonesia

- Introduced 5+ new technologies, improving efficiency and scalability across the Software Solution Group (SSG) and other divisions.
- Led 2+ weekly meetings to update stakeholders and keep them aligned, ensuring timely project delivery.
- Researched and documented 10+ feature comparisons between Datadog and New Relic to support Application Performance Monitoring (APM) decision-making.
- Delivered a successful Proof of Concept (POC) for Datadog and New Relic, leading to the selection of the optimal APM tool for 10+ applications across Bina Nusantara.
- Evaluated 3 media player platforms (MediaKind MK.IO, Wowza, BlendVision) and recommended Azure Media Services as a cost-effective, scalable replacement.
- Teamed up with the IT Technology Team to deploy Kubernetes for 5 mission-critical applications, improving container orchestration and scalability.

Teaching Assistant (Praetorian) | **Bina Nusantara Computer Club** Nov 2023 – Mar 2024
Part-time Indonesia

- Ran 2 weekly training sessions that strengthened the backend development skills of 50+ members, with a focus on the Laravel framework.
- Mentored and supervised 20+ participants through their final project for the backend development selection, ensuring high-quality deliverables.
- Taught 8+ lessons on Laravel architecture, CRUD operations, sessions, middleware, authentication, and authorization, tailored to the needs of BNCC members.

ORGANIZATIONAL EXPERIENCE

Co-Director | **Binus Blockchain and Crypto Club** Aug 2024 – Feb 2025
Research and Development Indonesia

- Proposed 2+ ideas for the design and functionality of the BBCC website to improve user engagement and support organizational goals.
- Created and maintained a Discord bot that automatically posts blockchain-related news from Instagram to Discord, keeping 150+ members consistently updated.

Activist | **Data Science Club** Indonesia | Apr 2023 – Nov 2023

- Completed data science and analysis assignments focused on statistical modeling and data manipulation using Python.
- Designed the club's website prototype in Figma, creating an intuitive and visually appealing user experience aligned with the club's objectives.
- Built the club's website using React, implementing responsive and interactive features to improve user engagement.

Member | **Bina Nusantara Computer Club** Indonesia | Nov 2022 – Nov 2023

- Attended 10+ weekly bootcamp sessions run by the Praetorian division, sharpening backend skills through best practices, modern tools, and hands-on projects for scalable server-side applications.
- Exchanged knowledge with peers in 13 discussions exploring backend solutions.
- Completed 2 major projects (midterm and final), applying learned concepts to design and implement efficient backend solutions.

EDUCATION

Bachelor of Computer Science | **Bina Nusantara University** Aug 2022 – Feb 2026
School of Computer Science Indonesia

- GPA: 3.92/4.00 (Summa Cum Laude)
- Thesis: The Implementation of Kubernetes with Autoscaling to Enhance the Scalability and Performance of API-Based Applications
- Relevant Coursework: Algorithm and Programming, Data Structures, Computer Networks, Software Engineering, Pattern Software Design, Agile Software Development, Operating Systems
